FIBRE OPTIC ESSENTIALS CLEANING KIT

According to numerous studies, poor connector cleanliness is the No.1 cause of network error and can be eradicated or greatly reduced with relatively little expense. Following the good practice mantra of Clean & Inspect Before you Connect will guaranteed repay the cost of the kit and man-power over and over again.

Our kits allow for thorough wet and/or dry cleaning for removal of stubborn grease marks and debris that will affect network performance. Enables cleaning of accessible fibre connector end-faces during the network build and on assemblies and receptacles for testing and maintenance purposes. Various tools will allow for good maintenance of your test equipment connectors and adapters as well. All items are available separately for replenishment.
