

FIBRE OPTIC 2U PATCH PANEL

An innovative and compact Patch Panel,
with greater capacity than a 1U Panel

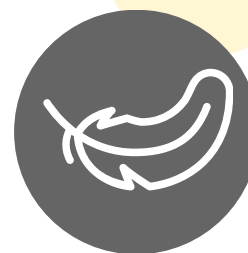

High-Capacity
(Up To 288F)

Patch Without
Disruption

Easy Access &
Installation

Lightweight
& Compact

FIBRE OPTIC 2U PATCH PANEL

The 2U patch panel has both space and depth, with an added dropdown rear door to provide easier access during installation. This allows the engineer to work efficiently, and with confidence that the neighbouring fibres are unlikely to be distributed. This can be critical when conducting upgrades or repair works. Additionally, the rear door allows for ease of inspection to the works without removing the panel from the cabinet.

The front door, made from Perspex, provides visibility and protection of the patching without disturbance. This can provide peace of mind when conducting network critical patching. The panel chassis, of aluminium construction, is extremely lightweight, allowing ease of installation to top of cabinets.

With all these added benefits, the panel still provides greater capacity than a 1U panel, delivering 288f for patch lead presentation and/or 288f fusion slices via up to six cassettes. The adapter plates also provide the benefit of modular style. With up to six plates to populate and seven plate styles meaning a mix and match adapter types and modes can be fitted to the same unit.

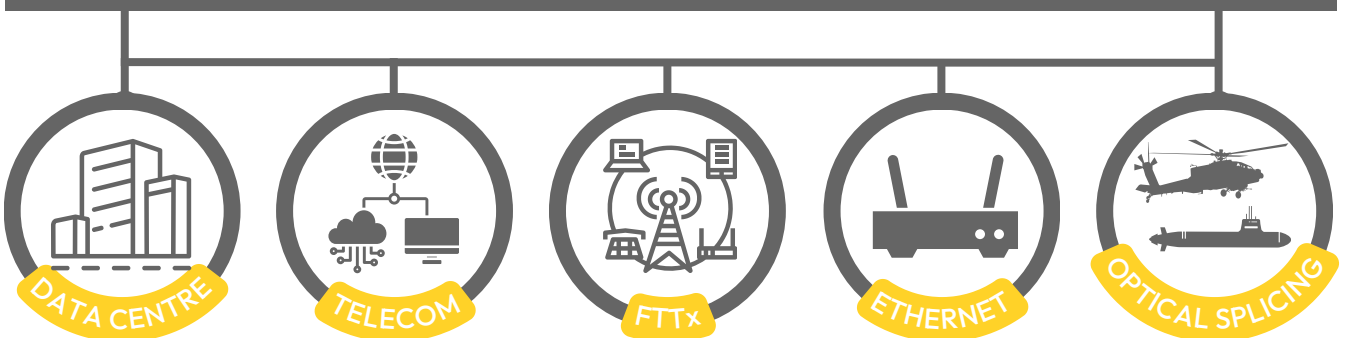

FEATURES

- Interchangeable Adaptor plates
- Designed for installation with 19" racks to IEC 297-3
- 2 x 25 cable entry slots to rear of panel
- Arms for cable management
- Transparent Perspex front plate for patch cord protected visualisation
- Hinged rear door

BENEFITS

- High capacity - Up to 288F in a single panel
- 2U Depth for additional working space
- Ease of access and inspection
- Suitable for pre-terminated solution
- Patch without disruption
- Provide more flexibility

APPLICATIONS

FIBRE OPTIC 2U PATCH PANEL

SPECIFICATIONS

Element	Characteristic
U Size	2U
Width	430mm
Depth	312mm
Cable Entry Slots	2 x 25mm
Cable Anchors	2
Material	Aluminum
Colour	Black (Powder Coated) RAL: 9005
Compliant To	RoHS, REACH

ADAPTER VARIATIONS

Adapter Type	Port Plates	No. of Adapters	No. of Fibres
ST	6 x 8	48	48
SC Sx	6 x 8	48	48
LC Dx	6 x 8	48	96
SC Dx	6 x 6	36	72
LC Quad	6 x 6	36	144
E2000	6 x 8	48	48
